**The experience starts with the press of a button.**

You will be amazed how simple the Piacere is to use. Ten large buttons and a clearly arranged display make it easy for users to serve themselves a delicious cup of coffee. And the machine is so versatile: With the adjustable cup shelf not only cups but latte macchiato glasses, small or large coffee pots with a height of up to 190 mm can easily be filled too.

**Indulgence is the name of the game.**

The result is as simple: quite outstanding, in fact! The Piacere makes coffee from freshly ground beans and – depending on the version – with fresh milk. In this way, the most intricate creations of coffee and chocolate can be prepared at the touch of a button.
